

JCloze: GAP FILL EXERCISE

Type a title for your exercise into the Title box. In the main box paste or type the text you want to use for the activity.

You can either ask the software to automatically select words to take from the text to create a cloze passage (click on 'auto-gaps'), or you can manually choose keywords you want students to replace. To do this automatically simply select '**Auto-Gap**'. You will be asked to enter the number of gaps you require, so enter a number. To create the passage manually, highlight the word in the text then click on '**Gap**'. A window will appear, asking you to include a clue and/or alternative answers if applicable. You do not have to add a prompt. Complete and click '**OK**'.

Once you have finished the activity, save the project by selecting **File > Save as >** (enter file name, e.g **CL**familie) **Save** and then create the activity by clicking on the spider web with the 6 icon on the tools bar or go to **File>Create Web page> Standard Format**. Save the activity with the same name.

Extra:

**You can add a timer to the activity. Click on the 'configuration' icon on the menu bar (see icon above) and choose 'timer'.

**Edit and add feedback, appearance and button using the 'configuration' tool.

**You can add a picture to the text: go to 'insert' > 'picture', you will be asked to save your activity first. Make sure your picture is saved in the same folder as your activity. You can resize and align the picture where you want to.

**You can insert a link to another file or a website: go to 'insert' > 'link'.

**You can also insert a recording or a video: go to insert> media object > click on add window media player > go to browse and find your file. You can change the size of the video or the play button for your recording.

**In the configuration section (see icon below) add special characters such as accents under 'Other' so that pupils can use them when typing words in the gaps.
