

# ***glogster.com***

First, you need to register, then click on:

You will be given this screen (or similar). You can get rid of the examples by clicking on them and the delete button on your keyboard or click on the 'bin'.

Next, you need to add a background. Click on 'WALL'. You will find a variety of backgrounds: Glog wall, Page wall and you can also import your own picture to add as background.

\*\*Glog wall: the middle part of your glogster (click on USE IT to see what it will look like)

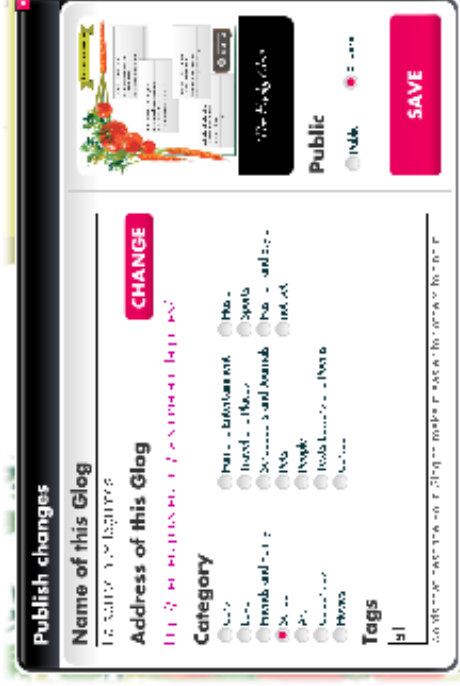

\*\*Page wall: the edge of your page.

You can add just about anything on the glogster: videos (also videos embedded from youtube), sound files, images, texts, graphics, etc. You can use your own or you can use the ones provided by glogster.

You can always edit the texts you write. Click on edit and change the colour, the font, the layout, etc...

Once you are done, give your glogster a name (at the top of your screen next to Glog Name). Publish and save your glog (as a gift, a greeting card or classic).

If you don't want to make your glog public, click on 'PRIVATE'.

Here are some examples where I used my own pictures and sound file and the glogster resources.
