

toonadoo.com

First, you will need to register.

You need to do cartoon strips, before you can do a book. Each cartoon strip is a page of your book.

Go to tools and click on 'ToonDoo Maker'

This window will appear. The ideal layout for a book is the 2 squares (2 pages), but you can choose any you want.

Now you need to set the background, choose the characters, objects, you can insert your own pictures / clip arts, props, text, etc... Drag and drop the images / clip arts in the scenes.

If you want to duplicate a scene, click on the right-hand top of the screen.

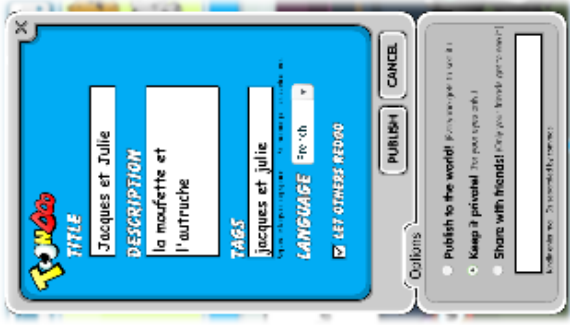

Once you have inserted the images / background and text, you can edit everything with the tools on the toolbar. To change the 'mood' of the characters, press 'Ctrl' hold and click on the image. You will have 5-8 different 'moods' for each character.

Once you are done, save your file. To create a book, you will need 3-4 cartoon strips (or more), so it is advisable to save the strips under the same name and with numbers 1-2-3-4...after. This will make it easier for you to place them in the correct order later on and will look good in the book.

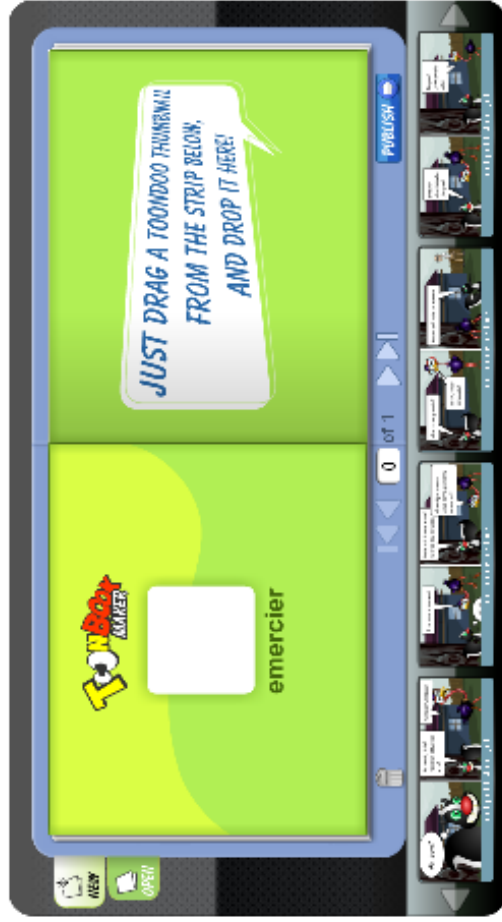

Notes:

This window will appear. Insert a title, a description and a tag. In the option box, click on 'keep it private' for now and once you have done your book, it will be published so that everybody can see it.

You will need to make 2-4 (or more) to be able to create a book.

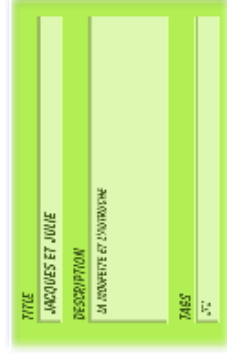

Once you have done all your cartoon strips, go to 'tools' > Book Maker.

'Just drag and drop' your cartoon strips in the correct order, then click on publish. Give it a name.

Here is an example:
